All data calculated at 415 volts. Motors marked * are 4 pole. All others are 2 pole. Distillate fuel burners are monobloc. Residual fuel burners have separate pumping and heating units. Modulating burners have separate control panel. Motors 5.5kW and over are star delta start. 1 kW = 1.34 HP. Run currents are for oil firing when on gas, this will be reduced to burner motor only unless oil is circulated.
